Embed all fonts

PDF Version: 1.3 - All transparencies must be flattened.

Formatting:

Ads must be delivered as PDF/ x-1a file. We recommend downloading the PDF settings on the AdShuttle log-in screen or use PDF/ x-1a settings in Acrobat 6 (2003) or later with all fonts and images embedded. Exporting a file with this file format indicates that it complies with a number of restrictions, such as CMYK, embedded fonts, no OPI, no annotations, no Javascript code and encryption are not used. It is a file format which helps to standardize the file sharing process and ensures the ad is ready for print.
